

What I claim as my invention is:

1. A small light source in combination with a hand-held tool comprising:
 - (a) a hand-held tool,
 - (b) a casing,
 - (c) a bulb located within the casing,
 - (d) mounting means for attaching the casing to the hand-held tool,
 - (e) power means for providing power to the light source,
 - (f) wherein the light source would be positioned to project a beam of light in a forward direction relevant to the hand-held tool when the tool would be in operation.
2. A small light source in combination with a hand-held tool according to claim 1 wherein the power means would further comprise at least one battery, the battery located within the light source.
3. A small light source in combination with a hand-held tool according to claim 1 wherein the power means would further comprise at least one battery, the battery located within the hand-held tool.
4. A small light source in combination with a hand-held tool according to claim 1 wherein the power means would be standard household current.
5. A small light source in combination with a hand-held tool according to claim 1 wherein the hand-held tool would be a power drill.
6. A small light source in combination with a hand-held tool according to claim 1 wherein the hand-held tool would be a chain saw.
